Wow!! Thank You! This is exactly what I was looking for. I use the Energy Control Icon for an old Compaq that I got on Ebay for the boot sequence. I wanted a nicer looking version so I

found this great little application. Thanks again! I bought this app just because I wanted to use it. I found this app to be pretty good and I use it a lot. I love how it lets you control the screen settings without having to be at a desk. There is one thing I think it could do better and that is a mode to put a timer on it. I know it can't do that but would be cool if it had it. Thank you for this great little app! This is a new design for a power off icon. The first three icons are great and cover almost every use case. However, the pen/paper icon is a bit too small and can't be made bigger, or placed better (right corner?) The 4th icon should be the "old" icon. This app is a very cool little app, but the icons and their placement are not right. The power button icons are not the "right" ones. I have an HP laptop that is now almost a decade old and one of the first things I notice that it is missing is the power button. This icon is just too

small. So it is little hard to notice that there is a power button on the top right corner. Also, the little gears on the top left corner seem to be in the wrong spot as well. Hello, I have followed your instructions to the letter and I tried the power off, turn on, sleep and hibernate icons. They all appear to work just fine in Windows 8.1 (modern UI) but none of them work on the 8.1.1 (touch) UI. I am so sure they do work as I have confirmed that they work on the 8.1 desktop. I have tried reinstalling 8.1.1 but still nothing. Has this problem been reported by any other users or is it just me? Thanks./* * Copyright (c) 2002, Oracle and
